Commissioner for Patents Washington, DC 20231

NOV 2 7 2001

Sir:

In the Claims:

GROUP 3/00

Pursuant to the Office Action dated August 24, 2001, please amend the above-referenced patent application as follows:

DEC 0 3 2001

Please add the following claims:

(New) An electrode adapted for supporting an arc in a plasma arc torch, 31. comprising:

an upper tubular member defining an internal bore therethrough and a threaded portion at one end thereof;

a metallic tubular holder defining a longitudinal axis and having a front and rear end, and a transverse end wall closing the front end, the transverse end wall having a front face and defining a cavity formed in the front face extending rearwardly along the longitudinal axis, the rear end defining a central passageway in fluid communication with the internal bore for directing a gas to the front end of said holder, said holder further defining a plurality of side openings positioned proximate the front end of said holder that are in fluid communication with the central passageway such that the gas can exit the central passageway only via the side openings positioned proximate the front end of said holder; and
